Subject: call external on a DEC Alpha (osf1 V2.0) Posted by dors on Tue, 27 Feb 1996 08:00:00 GMT

View Forum Message <> Reply to Message

According to the IDL's documentation for call_external under DEC Alpha/OSF1 the entry point into shared object files created have no leading or trailing underscores. I have found (using the nm myfile.so) that this is true for C, but not for FORTRAN! FORTRAN entry points have a trailing underscore.

Has anyone else noticed this?
