Guys:

I use IDL 7.0 + windows. When I run example "elevation_object.pro", I close the workbench firstly and the "xobjview" and "IDL Object Window 32" windows is not dissapear at the same time. So I shut down the those windows, and open "windows task magnager"(ctrl+alt+delete) and find the processes "idlde.exe", "idl_opserver.exe" still exists. Why?
