
Subject: Add a new tag for anonymous structure array

I have an anonymous structure array, say, A. Let us assume the size of the array is 100. Each structure has tags A, B, C. I want to add a new tag, D. How to do that in IDL?

I tried:

`myStruct = create_struct(A, 'D', 0)`, but it failed.

It seems that the above syntax works only for an individual structure instead of structure array.

For example,

`myStruct = create_struct(A[0], 'D', 0)` and it works.

This is an issue that can be easily solved in matlab. I am not sure whether IDL provides straightforward method to do that.

Sincerely,
Qi
