Subject: Convenient IGRF in IDL

Posted by Brian Larsen on Tue, 04 Mar 2008 16:00:24 GMT

All, as there are a number of space and other magnetic folks out
there, does anyone have a convenient IGRF (international geomagnetic
reference field) code for IDL. At one point I had a dlm but have
switched to mac and can't seem to find it again, and by convenient I
am hoping it is rewritten in IDL native. But I'll take anything.
This is probably a problem of me typing the wrong things into google.

Anyone?

Cheers,

Brian
