Subject: problem of multi-thread IDL program
Posted by wfzhao on Fri, 21 Mar 2008 14:41:13 GMT

Hi,
under linux, my IDL program is .sav file, executed in crontab.
I add 'time' to test the program's running time, I found out that
every time the program start, the time it need will become longer.
by the way, the program start at a very high frequence, about every 2
minutes.
so I don't know what happy?
