Hi again,

the way I cracked it was to move the following chunk:

```
; Position the window on screen
WIDGET_CONTROL, Event.Top, TLB_GET_SIZE = $
    ImageWidgetSize
WIDGET_CONTROL, GraphBase, TLB_SET_XOFFSET = $
    ImageWidgetSize[0] + 8
```

to AFTER the /REALIZE call to WIDGET_CONTROL.

Boy do you need to read that documentation carefully :-)

Take care,
Chris
