```

Oh, hell, I should never have reversed those damn axes!!
This will lead to another five questions. Sigh...

```
ticks = LOGLEVELS([0.22,0.55])
nticks = N_Elements(ticks)
Plot, data, /YLOG, YRANGE([0.22,0.55])YTICKS=nticks-1, $
  YTICKV=ticks
```

Cheers,

David
