Hey David,
thank you for your article. I utilise the LOGLEVELS for put the yticks
and works good !

The only problem that I have is in some cases.
For example, if I want to representate a log axis with values
[0.2,0.55]. Then the loglevels returns 0.5 but if I do the plot with
YTICKS=1 and YICKV=LOGLEVELS(yrange) the following problem occurs:

% PLOT: Data coordinate system not established.

Do you know why ? What can I do to solve this problem ?
