Hi,

I am using Dialog_pickfile to write a jpeg, using file='a string i insert here'. My problem is that if i want to change the directory in which dialog_pickfile defaults to it wipes the string i initially inserted. Is there a way i can fix the default filename so that the user can pick a directory to save the jpeg without having to retype the file name back in?

```
filename = Dialog_Pickfile(/Write, File=username  
+'-'+info.file_name,DEFAULT_EXTENSION='jpeg')  
IF filename NE " THEN Write_JPEG, filename, snapshot, True=1
```

many thanks,

Clive
