Thanks a lot, Mary Jo, for your comments and suggestions.

I recently added the endaccess call, but unsurprisingly there was no chance to my problems!

I haven't checked out the return codes, that might provide some insight, hopefully!

Also, I hadn't used the EOS_GD interface before, I must check that out one day. It looks interesting, is a part of the IDL standard distribution?

HDF-bot: I know the feeling!

Thanks again, Alex.
