Subject: Re: Which version can I install on Redhat 8.0 Posted by russell.grew on Thu, 22 May 2008 05:28:56 GMT View Forum Message <> Reply to Message

It may be that you need to install the appropriate version of 'glibc' to make IDL work.

Failing this, you could roll back to 6.3 or 6.4 but then you may strike the infamous libX11 segmentation fault ~~~ there are several workarounds for this.

Cheers.

Russell.
