---

Hello IDL gurus,

I am having some trouble regarding '.mj2' extension. I have couple of '.gif' files and by using IDLffMJPEG2000

I can get some nice animation. But the fun just ends there. I need to have these on a more 'portable' formats as in : avi, mpeg, mov etc. A little searching on the net did not bring anything home.

I was hoping to get some pointers on how to convert these mj2's avi/ mpeg/ mov etc.

Any help will be highly appreciated.

Best,

Tareque
