Subject: Project sav file in 7.0
Posted by helaha on Mon, 02 Jun 2008 13:28:09 GMT

It hasn't been possible for me to create a sav file from a project
with several routines since version 7.0. I read the tech tips
carefully and tried it accordingly, but without success. The problem
is always that there aren't all routines resolved. The file gets
bigger if the command ITResolve is included and then the itools work,
that's OK. I tried to store all the routines into one single folder,
but without success. Sometimes, but not always small red crosses
appear in the project window on some routines? Even more, the sav file
doesn't have always the same size. Is there an issue with lower case
letters and capitalized letters? I had no problems before version 7.0.
Does anybody have a clue?

Thanks for any hint,
Helmut Ahammer
