---

this may be a stupid question and it might be that i am an idiot,  
but...

i want to spawn a process

```
cmd='ls -l'  
spawn,cmd
```

i am actually doing this with a GET command and it sometimes hangs

if i try

```
spawn,cmd,/nowait
```

it tells me

Keyword NOWAIT not allowed in call to: SPAWN

but it says it is in the help?

any ideas?

thanks

russ
