Subject: spectral mapping:sff
Posted by tinkerbell on Thu, 05 Jun 2008 11:43:19 GMT

To whom it may concern,
I am working on spectral mapping with Aster images. Sometimes SFF
spectral mapping method is not working and giving the following error.

"spectral_feature_doit: An error has occurred during processing
Error: Attempt to subscript LIB with VALID is out of range. "The
result may be invalid""

Both my spectral lib and the image is floating and I resampled my
spectral library x scale according to the image x axis, but didn't
worked.

Do you have any idea about this error.
Thanks
