Hi,

So i have a virtual machine application and i want to be able to pass a path to it when i run it. So for example,

```
pro software, data_path
```

```
blah
```

```
blah
```

```
end
```

i then save this as a virtual machine program -> software.sav and i run it as,

```
idl -vm=path+software.sav
```

So my question is how do i pass the data_path?

many thanks

Clive
