LC's No-Spam Newsreading account writes:

> My environment is Linux Suse 9.2, and I use fvwm as window manager (with
> two desktops with four workspaces each). Incidentally I have configured
> the window manager so that my web browser (firefox) always opens in a
> dedicated workspace.

You can select any number of other browser options,
including using an internal browser, I think. Anyway,
worth a try. You can find the Web Browser preference
under the General Preference tab in Preferences.

Cheers,

David
