Subject: doc_library question

Hi,

I've been using IDL 7.0 for some time and I just installed it on a
solaris system and I would like to use the DOC_LIBRARY function but it
can't seem to find it.

IDL> doc_library, 'plot.pro'
% Attempt to call undefined procedure/function: 'DOC_LIBRARY'.
% Execution halted at: $MAIN$

Does anyone know why or where should I look to make sure the correct
libraries are installed?

Thanks,
Ryan.
