Subject: Read binary data Posted by xiao zhang on Wed, 16 Jul 2008 15:50:05 GMT View Forum Message <> Reply to Message

HI~ every one ~

I am trying to read a binary file which is 17920168 bytes and the first 168 bytes of it is header infromation, The rest of it is 800*800*14 two bytes integer. (like a 3 dimention array.) Can any one help me to read it out? There should not be so many zeros in it, but i tried several times it still shows a lot of zero.

Thanks~
