Subject: widget for incrementing/decrementing an integer
Posted by cgoethel on Thu, 17 Jul 2008 18:00:31 GMT

Hello All,

I'm looking for a good way to create a widget that simply increments
or decrements an integer (an editable text box with up and down arrows
on the right hand side of the box). I tried using a text widget with
scroll bars, but that seems clumsy at best (besides I cannot figure
out how to remove the horizontal scroll bars). Anyone have a
suggestion on a nice/clean way to implement that? Is there an existing
widget that I'm missing?

Thanks!!!

Cindy
