Kevin> The error I recieve is: "Failed to write file: <filename  
Kevin> here>" (with the actual filename where <filename here> is  
Kevin> of course :-)

Kevin> Ideas?

Nope, I've got the same problem, too. I use IDL with  
OpenVMS/Alpha. But I can use the procedures created by wided and saved  
'Without header'. So, the problem seems not too serious to me.
