In investigating this more this morning, I find that the
scientific data updates are in a *separate* download on
the ITTVIS web site. These are NOT installed as part of the
IDL 7.0.3 Workbench update.

Unfortunately, I don't know how to install the scientific
data updates, because the link to the installation instructions
(for Windows, anyway) is broken. :-(

Can anyone shed light on this?

Cheers,

David
