Unfortunately I would like to help, but I think I need a piece of code
or something to work with.

Do you have this ?

It works for me by default, as long as I add them one after the other:

```
oView = OBJ_NEW('IDLgrView', $
                VIEWPLANE_RECT=[0,0,80, 100])
oModel = OBJ_NEW('IDLgrModel')
oView->Add, oModel

head = READ_BINARY( FILEPATH('head.dat', $
    SUBDIRECTORY=['examples','data']), $
    DATA_DIMS=[80,100, 57])

oModel->Add, OBJ_NEW('IDLgrImage', head[:,*,0], /INTERP)
y = FIndGen(200)
y = Sin(y/2) / Exp(y/1000)
x = IndGen(N_Elements(y))

plot = OBJ_NEW('IDLgrPlot',x,y,color=[255,255,255])
oModel->Add,plot
oWin = OBJ_NEW('IDLitWindow', DIMENSIONS=[300,300], $
    TITLE="Test")
oWin->Add, oView
```
