---

For example, i hava an array like this:

```
13, 14, 15, 16, 17
23, 24, 25, 26, 27
2, 4, 5, 66, 7
13, 14, 15, 16, 17
13, 14, 15, 16, 17
```

i know the center value is 5 .Then i want to subset the array to 3\*3  
and 5 is still the center. Just subset like this :

```
24, 25, 26
4, 5, 66
14, 15, 16,
```

Any one has good ideas how can i do that? Thank you~
