Subject: matrix multiplication of 2 three-dimensional arrays

Dear experts,

I would like to matrix multiply two matrices with dimensions
[3,3,1500]. means: 1500 times a matrix multiplication of 2 matrices
with dimension [3,3]
I could do this with a for loop over the dimension [1500] but i
suppose this is not very elegant. Is there any other way to do this
time-efficient.

Best regards,

thomas
