Ah, I just got back from the eye doctor's. Guess I wasn't
a minute too soon. :-)

Well, the one everyone is complaining about works for me, too.
Although it is not in color.

Don't know what the problem is. I'm running some version of
IDL that is not IDL 7.0.1. 7.0.2, I guess. (Too old to figure
out the new IDL numbering scheme, and all those decimals are
blurry anyway.)

Cheers,

David
