Subject: Re: Matching Lats and Lons from two arrays
Posted by Brian Larsen on Tue, 26 Aug 2008 16:11:38 GMT

I have tried this on several occasions (for a little different
application but I think its the same) and have had no luck eliminating
the for loop, so I just wrote it in a function to hide it from
myself. This is my try at this based on value locate:

d2array_(updated_7Jan2008).html

If others know how to eliminate the for loop that would be fantastic.

Cheers,

Brian
