G'Day David,

I'm relieved to hear that you're not completely leaving the best usenet group on the Internet. Our MRI physicist made transition to Java a few years ago and I have recently started some work extending a Java DICOM parser (DCM4CHE) to do useful things. I've known Java for nearly 10 years and I haven't seen any other language which is more verbose nor easier to understand.

I probably sound like your wife but, exactly how many times have you promised to stop being an IDL consultant?

Thanks for all your help and for helping my students when I'm a lousy teacher.

Cheers,

Robbie
