Subject: Re: Create a GEOTiff image
Posted by titan on Mon, 08 Sep 2008 14:04:45 GMT

Dear David,
thank you for your suggestion.
I was also thinking about another way (hopefully not a stupid one):
are you aware if it's possible to create geographic lookup tables
(GLT's) in IDL?
My idea is the following: combining the image file of the map with the
GLT
for creating georeferenced images

Thank you in advance.
