I am a newcomer of IDL, when I try use write_tiff to write a integer type tiff, the result always wrong.

```
input = intarr(1000,1000)
write_tiff, 'outimag.tif' , input
```

the result would be a byte type tiff file, and when I use

```
write_tiff, 'outimag.tif' , input,/short, result will be unsigned
int
```

```
write_tiff, 'outimag.tif' , input,/long, result will be long integer.
```

could somebody help me about how to output a integer type tiff file.
Thanks
