
Subject: IDL -> C : How to save data from IDL?

Hi guys,

I have managed to get CUDA interfacing to IDL and so far its all good.
However, whenever I get problems in C or CUDA, I can't run a debugger
because it doesn't recognise IDL. So I want to separate the C code
from IDL and this means I have to be able to load data from within C.

How do I save data that is IDL for C to use?

I'm thinking of

running IDL program -> C program which writes the data into a file

Thanks

Zaki
