
Subject: IDL calls C calls IDL?

Hey again,

I've been thinking, I have code that does

```
LINKIMAGE 'func' ,.....
```

```
for t=0,tmax-1  
  func(data)  
  idl_function(data)  
endfor
```

Is it possible to call idl_function from within C ?

I want it to be like this

In IDL:
func(data)

Then it passes onto C which does
for (t=0; t<tmax;t++)
{
 do whatever it does with data
 CALL IDL_FUNCTION(data)
}

This eliminates me calling func a few million times

Can it be done?
