Subject: surface plots into an image
Posted by Peter Clinch on Mon, 29 Sep 2008 12:30:17 GMT

There's probably a Really Easy Way to do it, but either the manuals
aren't yielding it easily or my brain is in Monday Mode; perhaps someone
here can help?

is there an easy way within IDL to get the contents of a plot window
into something I can write out as an image?

(I have 30+ slices of an array which are shown as either individual
surfaces or contour plots and I'd like to make a video of them in
sequence: easy enough with image files, and easy enough to do just one
from an iTool or a window capture, but how do I do it systematically
from a FOR loop or similar?)

thanks, Pete.
