A side note: I was able to make the cursor work in 7.0 with 10.5.5
and X11 2.3.1 by selecting "Click-through inactive windows" in X11
preferences.

Clicking works in 7.0.4 without this preference selected, but I don't
have an updated license file from ITT yet. It's the weekend and I
couldn't wait. Presumably Monday I'll get my new license file that
works with 7.0.4
