Subject: Return two arrays
Posted by frankosuna on Tue, 07 Oct 2008 21:25:09 GMT

I've been having some problems returning two arrays in which each
contains an image of 1024x1024. I have to return these two images
from a function but I haven't been able to get it to work properly.
Does anybody know how to do this in a smart way?

Thanks,

Frank
