Hi David!

Are you really sure about this? I have quite a number of friends who had no trouble to download the VM just recently (last week) to use my programs. All you have to do is a free registration on the ITTVIS webpage. Then you have free access to the VM. And, yes, you have to download the whole IDL distribution (running in demo mode after installation) + the VM. No insurmountable problems at all. Only it is about a 260 MB download and, as others already mentioned, you need admin rights for installation.

Cheers,
Michael
