I wanted to add my macbook pro (GeForce 8600M GT) results to this thread. It took a while to get this running, there were 64/32 bit issues and patience (thanks to Nathaniel Sizemore at Tech-X).

```

GPU Time =    0.044982195
Speedup =     17.582957
IDL> print, !version
{ i386 darwin unix Mac OS X 7.0.4 Sep  3 2008    32    64}
```

I am looking forward to playing with this and seeing which of my codes will be much faster.

Cheers,

Brian
