This is how I switch between IDL 6.4 and IDL 7.0 on my MacBook Pro:

```
$ source /Applications/itt/idl64/bin/idl_setup.bash
```

```
$ idl
```

```
IDL Version 6.4.1, Mac OS X (darwin i386 m32). (c) 2007, ITT Visual  
Information Solutions
```

```
IDL> exit
```

```
$ source /Applications/itt/idl70/bin/idl_setup.bash
```

```
$ idl
```

```
IDL Version 7.0, Mac OS X (darwin i386 m32). (c) 2007, ITT Visual  
Information Solutions
```

```
IDL> exit
```

Cheers,

Liam.
