> So you are trying to solve  $\int_0^t f(x)dx=A$  for  $t$  given  $A$  and  $f$ ?  
Exactly! wasn't sure if LaTeX-style notation would be acceptable, but  
certainly makes communication of problems easier...

> I would probably just use the simpler method with interpolate  
OK - was that the (rather unsatisfying) solution that I originally  
proposed?

Thanks,  
Steffen
