Something like this:

```
OpenW, lun, 'logfile.out', /GET_LUN
FOR j=0,n DO BEGIN
```

```
    Catch, theError
    IF theError NE 0 THEN BEGIN
        PrintF, lun, 'Problem with processing step ' + StrTrim(j)
        CONTINUE
    ENDIF
```

```
    DoSomeProcessing, data[j]
ENDFOR
Catch, /Cancel
Free_Lun, lun
```

Cheers,

David
