In article <18DEC199211000500@stars.gsfc.nasa.gov>, I accidentally left an important command out of an example. It should have read

```
IMAGE = TVRD(0,0,!D.X_SIZE,!D.Y_SIZE)
TVLCT,RED,GREEN,BLUE,/GET
SET_PLOT,'PS'
```

DEVICE, /COLOR, BITS_PER_PIXEL=8 ;<--- Line left out.

```
TV, IMAGE ;Note: Not TVSCL
TVLCT,RED,GREEN,BLUE
SET_PLOT,'X'
```
