OK Gurus,
why does this happen?

```
IDL> print, n_elements( *(pstate).ptr_counts )
      120
IDL> print, *(pstate).ptr_counts[1]
Subscript range values of the form low:high must be >= 0, < size, with
low <= high: <No name>.
Execution halted at: MS_GENERATESPECTRUM 489 C:\ISI\Rad-Img\code
