I have to calm down first. I just spent the past 24 hours
or so driving on ice covered roads at 20 mph. I must
have seen 15 cars off the road and upside down. The
3rd Edition is just about the LAST thing on my mind at
the moment. :-)

Cheers,

David

P.S. One of the joys of road trips, of course, is the
opportunity to re-visit your sorry life and think about
what you would do differently if you had the chance. In
addition to telling my wife I loved her more often, I would
have finished that damn book by now. :-(
