Please correct me if I am wrong... it's from old souvenirs...

```
> perhaps it is an easy one, but I am having problems reading the
> following in IDL:
  open(11,file='file name',form='unformatted')
open the file
  rewind 11
go to the beginning of the file
> do i3=1,np3
    write(11) ((delta(i1,i2,i3),i1=1,np1),i2=1,np2)
   end do
ok, that's the "fun" part. You have 3 loops here.
you could read it as follow:
for i3=1, np3
 for i1 = 1, np1
 for i2=1, np2
  write(i1,i2,i3)
Please double check that I haven't inverter i1 and i3's loops...
Read http://docs.hp.com/cgi-bin/doc3k/B3150190022.12120/15 for more
explanations
Jean
   close(11)
```
