Hi Chris,

Have a look at http://www.skippysky.com.au/2008/South_America/

I've done a 10x10 degree box around Cerro Tololo.

The numbers in the filenames are the number of hours forward from the
start of the dataset.

The title on each image will be more informative.

Give me a day or two to amend the SkippySky webpage.

Andrew

PS : and don't forget my half hour of imaging on the 4metre... ;-)
