Hello!

I'm looking for a neural network implementation in IDL. On the LPL IDL searchable database (http://www.lpl.arizona.edu/idl_sub/search_idl.cgi) I found that ANN-libraries (Habbersett) were distributed with IDL up through version 3.6.1. Unfortunately, I'm using IDL 4.0.1.

Are there any other implementations - is the one mentioned above available from any other source?
