I am to creating a monthly time series data from daily averages data that spans from 1999 to 2008.

However, there data gaps of about 2 to for 4 days for some of the monts. So that this data would look like this

```
20/07/1999    20
24/07/1999    40
```

You would notice that there are 4 days missing but the data shows no gaps int it.

How can I expand this kind of data to look like this

```
20/07/1999  20
21/07/1999  NaN
22/07/1999  NaN
23/07/1999  NaN
24/ 07/1999 40
```
