I am to creating a monthly time series data from daily averages data that spans from 1999 to 2008.

However, there data gaps of about 2 to for 4 days for some of the monts. So that this data would look like this

20/07/1999 20 24/07/1999 40

You would notice that there are 4 days missing but the data shows no gaps int it.

How can I expand this kind of data to look like this

20/07/1999 20 21/07/1999 NaN 22/07/1999 NaN 23/07/1999 NaN 24/ 07/1999 40
