Here's what I have:

```
IDL> openr, 1, 'file1.out'
IDL> h = strarr(5)
IDL> readf, 1, h
IDL> close, 1
IDL> for j=0,4 do print, h[j]
T   U   17.81 201  145225.9
T   U   37.67 191  98975.8
T   U   21.77 201 129774.9
T   I    0.65  1   69.5
T   I    0.36  1   69.3
```

By doing this I noticed that the values in the last column get pretty large, so I changed the format to
format='(2A2, G7.2, G7.2, G10.2)'

And I still get the same error.

The largest values in the numerical columns are:

column 3: 272.23

column 4: 1000

column 5: 145225.9
