Subject: call_external under SunOS 5.4 Posted by chs11 on Tue, 09 Jul 1996 07:00:00 GMT

I have a bunch of fortran subroutines which I have successfully called using call_external and C wrapper functions under SunOS 4.1.3.

I am now trying to use the same code under SunOS 5.4, but I cannot figure out the correct compiler options. (The examples in the manual don't seem to work). Has anybody gotten this to work?

Carl
